

ESSENTIALS PEAK FOLD DIVIDING CURTAIN

MODEL
CURT-PF

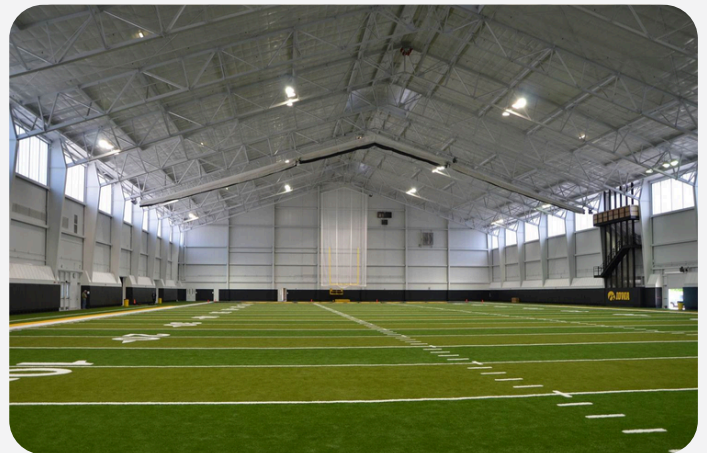

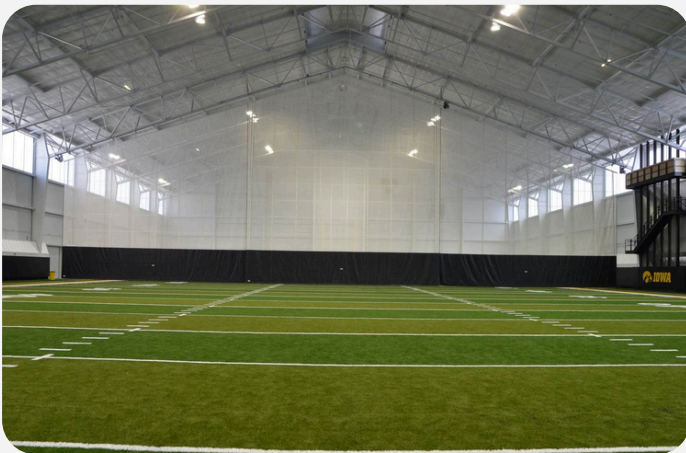

The Essentials Peak Fold dividing curtains are an innovative solution for facilities with low roof heights and an apexed ceiling.

The curtain is an Essentials style fold up design that “folds” in the middle as it retracts to allow it to fold to mimic the slope of the ceiling.

The system typically features 2 meters of opaque vinyl at the base and vinyl-coated mesh at the top; however, it can be adapted to all vinyl or all mesh configurations if needed.

The system is operated by a key switch with a micro-switch limiter, which automatically determines the heights when raised or lowered. The curtains are customized to each facility's specifications.
