

ESSENTIALS WALK DRAWN DIVIDING CURTAIN

MODEL
CURT-WD

The Essentials walk drawn dividing curtain is a budget solution to reduce ball movements between courts in sports facilities.

As opposed to upward retracting systems, walk drawn curtains retract to the side of the building on a cable or track, and store against the wall or in a cupboard.

These systems are made from the same mildew and fire resistant rip stop vinyl base as the roof retractable systems, but do not have a steel member in the base to allow them to retract.

The curtain is mounted on specially designed nylon rollers that ensure it glides smoothly into position and back again, and the system can be made in different configurations such as a split in the centre, full mesh etc.

Please note with these systems, that the curtains can move along the track when deployed and will need to be corrected while in use.

System: Dividing Curtain
