

## Hockey Side Boards

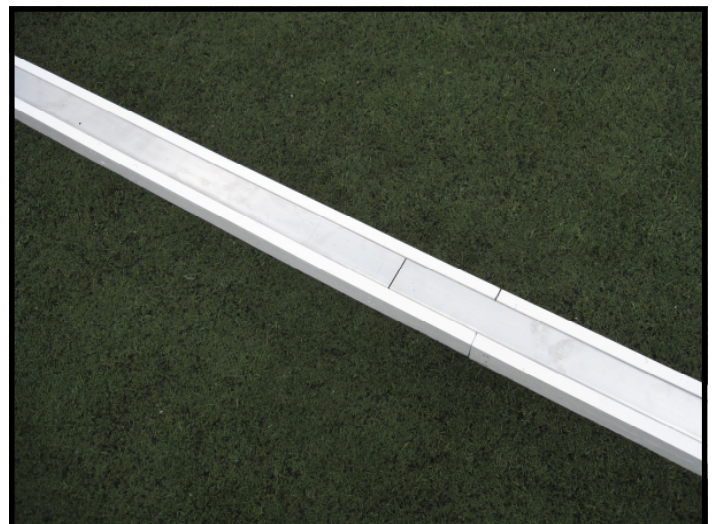

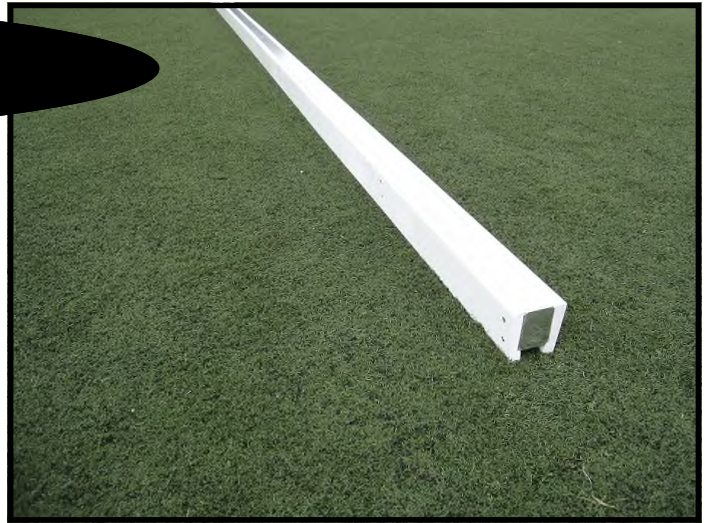

Hockey sideboards ideal for indoor competition, modified outdoor games and training.

Made from timber, the system has a rigid steel core for superior ball bounce, stability and rigidity. The timber sides are chamfered as per Indoor Hockey regulations, and painted white.

The system interlocks and is positioned on the ground without the need for any ground anchors in the floor to provide total mobility.

Supplied in 2 meter lengths for fast deployment, and storage trolleys are available to quickly set and strike a court, and remove the boards to storage.

This European design includes double sided playability so can be used interchangeably without issue, and for double the lifespan of a typical board.

**System:** Hockey  
**Product Code:** HOCSB

Revision 2.0 26/07/2016
