

## BASKETBALL MANUAL WINCH

The winch is operated by a manual handle and should be mounted at an appropriate height to allow operators of all sizes to turn the handle.

Power drivers can also be used and information is available on request.

Although manual winches are offered as a cost saving measure HiTech Sports strongly suggests manual winches should not be used for OH&S, difficulty of use, and equipment safety reasons.

Please note there are no automatic height cut outs on manual winch systems, and operational errors are common, leading to over winding of the cable and potential damage to the structures.

Please also note operator error is NOT covered by warranty.
