

FIBA CERTIFIED LEVEL 1 PORTABLE BACKSTOPS

When the big boys want to play NBL Basketball, you need to wheel out the real backstops.

HiTech Sports offer a comprehensive range of Top Level FIBA Certified Level One or Three Basketball backstops right through to junior recreational systems.

These systems are tested and approved by the international governing body in Switzerland to be used in all Top Level FIBA Level One and Three competitions including Test Match international levels right through to high school competitions.

A range of systems are available from major international manufacturers and available with a range of options.

All systems come complete with the required protective safety backboard padding, 180 degree pivot spring loaded ring, armoured glass backboard and are height adjustable.

Spring assisted systems are the preferred option as simpler and require much less maintenance. These units fold up compactly for storage, then can be wheeled out onto the court, locked into position, tied down to the floor anchor and unfolded ready for play by one person in minutes. Some systems can have a counter weight added and do not require anchoring.

Systems are supplied with a certificate of international approval, and different designs can be configured to suit almost any facility.

Other FIBA certified systems like Padding, Scoreboards, Scoring Benches and Shot-clocks are also available.

Other smaller systems are available for FIBA Level One, Level Three, Club, Stadium, College and School levels.

System: Basketball
