

ESSENTIALS OUTDOOR BASKETBALL SYSTEM

Affordable Safety, Strength & Stability

The Essentials Outdoor Basketball System is designed for every day heavy duty environments such as schools, parks and other institutions. A cost effective system, but engineered to provide maximum strength, outstanding durability, and certified for cyclone rated areas.

- 50mm fibreglass backboard has a bolt free face which delivers excellent, consistent ball rebound that cannot be achieved on wooden backboards.
- The fibreglass system is fully ribbed for maximum strength, has a steel plate for ring support and will not break down over time or delaminate.
- Designed for direct burial static installation only, for sleeved systems see the **BBJAM** or **BNB24** systems.
- Supplied with a heavy duty goal, which has continuous wrap no-tie net hooks for safety.
- Strong 115mm diameter galvanised steel main support post with a 1.5m projection into the court.
- Independently tested for strength and manufacture quality.
- Flat pack design for ease of transport and lower cost outlay.
- Protective padding also available.

For the installers, the backboard is adjustable, allowing flexibility of installation while saving you time and effort. You just attach the extension arms at the appropriate height.

These are tested and certified for the Education QLD State Schools Basketball Specifications and Australian Design Standards.
