

ESSENTIALS DIVIDING CURTAIN

The HiTech Essentials dividing curtain is a “traditional” style system, but with many improvements designed to increase the durability and lower the maintenance requirements.

- These curtains mount on purlins or structural members, but do not require specific beam.
- All are supplied with key operated electric winch with height limit settings.
- Systems include heavy rip stop vinyl base that is mildew and fire resistant.
- The top section is a coated mesh instead of netting to increase durability.
- Pickup cables are aircraft grade steel as opposed to nylon cord so do not stretch and cannot easily be cut.
- Simplified line shaft retraction system, eliminating complicated cable runs and the need for multiple high maintenance pulleys.
- Padded lower pocket.

Check the [online video](#) for full demonstration of this system.
