

STADIA CENTRE ROLL DIVIDING CURTAIN

The HiTech Stadia Centre Roll dividing curtain range is the most advanced system currently available in the world. This curtain is completely free of troublesome retractor cables, meaning it is sleek, clean and without trip points in comparison to older designs.

- The latest system no longer has 'torque straps' to further enhance the lines and reduce maintenance.
- The curtain retracts onto a centre roll at twice the speed of comparable models, through concealed motors within the curtain adding to the aesthetic.
- The system has a thermal motor cut out and simple key switch operation.
- The latest model features larger centre tube diameter for faster operation, and more powerful motors.
- Once retracted, it stores more compactly than any other system in the world.
- These systems can be mounted to a structural beam or off purlins as required.
- Made from durable heavy mildew resistant rip stop vinyl and vinyl coated mesh for the transparent section, both materials are Fire Rated to AS/NZS 1530.3-1999 and available in a wide range of colours.

Check the online video for full demonstration of this system.
