TOP ROLL DIVIDING CURTAIN

MODEL
CURT-TR

The Top Roll dividing curtain is an elegant, sleek solution for partitioning areas in any facility.

The curtain rolls up neatly onto a top roll, with the motor fully concealed inside, enhancing its visual appeal.

Unlike other designs, the system is free of retracting cables, offering a clean, sleek look without trip hazards.

It features an instant-reversing winch to prevent motor burnout if the direction is quickly changed.

When retracted, the curtain stores compactly and discreetly, easily fitting into a bulkhead for a hidden look.

These systems are mounted to a structural beam.

These curtains are extremely low maintenance and come in a wide range of colours, available in both rip-stop vinyl and vinyl-coated mesh for the transparent sections.

System: Dividing Curtain
Product Code: CURT-TR
