

TOP ROLL DIVIDING CURTAIN

The Top Roll dividing curtain is an elegant show piece in any facility.

The curtain retracts onto a top roll, and the motor is fully concealed within the curtain adding to the aesthetic appeal.

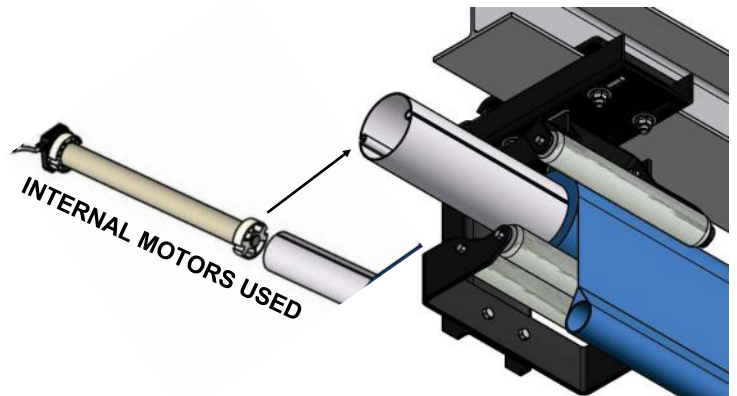

The system is completely free of troublesome retractor cables, meaning the curtain is sleek, clean and without trip points in comparison to older designs.

The system is equipped with instant reversing winch operation to prevent burnout if direction is immediately changed.

Once retracted, it stores compactly and discretely, and can easily be housed within a bulkhead for 'invisibility'.

These systems are mounted to a structural beam, or can be mounted to a drop cradle off purlins.

They are extremely low maintenance and a wide range of colours are available both in rip stop vinyl, and in vinyl coated mesh for the transparent section.
