

EQUIPMENT SAFETY AUDIT

Regular Safety Audits are a critical event for all facilities in order to protect their users, and ensure optimal operation of their sports equipment systems.

Over time through use, all sports equipment systems deteriorate. Parts will wear or work loose, and just like all machines and plant, sports equipment needs to be regularly checked and maintained to ensure it is safe, that there is no rust or corrosion, that bolts are tightly secured and any number of other specific components are in good working condition.

HiTech Sports provides a comprehensive Safety Audit service for all of our own installations, we can also assist with existing equipment such as Basketball towers, Dividing Curtains, games posts etc which may not have been checked for a while.

We believe safety is of critical importance, and have seen many incidents over the years where poorly maintained equipment has failed, and resulted in serious damage or injury.

If you haven't had your equipment Audited in recent times, or have nobody able to provide this service for you, please let us know. We would be happy to help, and have one of our experienced and accredited technicians come to your facility to carry out a comprehensive check on any items required, and provide a report on completion.

To book an audit or for more information please [contact us](#).
