

SKYMASTER® - ROOF MOUNTED VOLLEYBALL

For the ultimate in convenience for Volleyball facilities, eliminate the need to set and strike posts with the roof mounted Skymaster® Volleyball system.

Hinging from the roof, this system deploys or retracts and eliminates the need for manual handling. Everything is permanently in place and ready for play, (the net, antennae, pads, cable covers and umpire stand), and lowers into place at the turn of a key or push of a button.

Adjustable locking rails slide the full length of the posts easily allowing multiple sports such as Tennis, Fistball, Badminton, Newcombeball, Sepak Takraw and Volleyball.

This system is ideal for facilities with limited staff to set up and take down posts. It saves on storage space, and the risk of equipment being dropped on the floor causing damage. Systems are custom made to suit specific venues, and engineered to suit each project.

System: Volleyball/Multi Sport
