ESSENTIALS SIDE FOLD BACKSTOP

MODEL
BBESW

- Engineered to allow flexibility in installation and a quality product at a lower cost

* Mounts to 150mm SHS or engineer approved wall

- 50mm core mount fibreglass backboard for consistent rebound

- Sideways folding operation with offset hinges for flatter storage
- Direct mount goal connection to centre mast providing complete structural strength
- Adjustable projection up to 3600 mm on standard system
- 6 connection points to the wall, including 4 steel arms for maximum stability

- FIBA level 3 certified for use in international competition and Education QLD Basketball specifications.
- Designed for use in schools, and recreational or community centres
- Upgrades can include spring loaded rings, backboard padding, height adjustment systems, and electric actuation enabling automatic folding via key switch

Check out the online video for a full demonstration of this system.

⚠ Please note custom configurations require longer lead times and additional costs and all installations require structural steel beams to already be in place.
