BASKETBALL

BASKETBALL ELECTRIC WINCH

MODEL
BBEWN

Designed specifically for use with Basketball systems, this system utilises high strength metal gears to ensure long life and uninterrupted service. No plastic gears, rubber belts or chains are used. Options for keypad or handheld remote controls are available.

- A precisely machine grooved cable drum ensures smooth, safe cable control and reduced wear
- Tension roller to ensure correct cable tracking
- Locking limit switch, secured and designed not to move with vibrations
- Supplied with switchgear and special 4 pin twist lock plug

Additional Information

- Suits 220-240v operation
- Powerful, instantly reversing ¾ HP motor
- 566 kg of vertical line pull
- Large grooved drum ensures long cable life and proper coiling
- Hardened steel worm gear is captured to take on radial and thrust loads
- Specified to continuously run at the maximum rated load of 566kg for 20 minutes without sustaining any gear damage
- Positive locking in the double reduction worm gear drive that provides 200:1 reduction rate for a strong hold under load
- Sealed gear case with precision ball bearings and a premium seal for a lifetime of maintenance-free operation
