HiTECHSPORTS pty ltd

BASKETBALL MANUAL WINCH

MODEL
BBMWN

The winch is operated by a manual handle and should be mounted at an appropriate height to allow operators of all sizes to turn the handle.

Power drivers an also be used and information is available on request.

Although manual winches are available as a cost-saving option, HiTech Sports strongly advises against their use due to concerns related to OHS, operational challenges and equipment safety.

⚠ Please note there are no automatic height cut outs on manual winch systems, and operational errors are common leading to overwinding of the cable and potential damage to the structures. Please note operator error is not covered by warranty.

System: Basketball
Product Code: BBMWN
