BASELINE FIBREGLASS BACKBOARD

MODEL
BBLB

The Baseline backboard is a cost effective entry level backboard that can be fitted to many HiTech Sports Basketball systems.

Designed to provide a superior product to wooden backboards, this system includes a glass fibre/resin application to a solid timber core for additional weather resistance and rigidity, finished in a hard wearing gel coat.

This product has similar performance to glass boards in terms of rebound, but significantly outperforms them in strength and weather resistance. It provides a budget-friendly alternative with the option to add higher-level upgrades at any time down the track.

Can be retrofitted to replace timber backboards on existing systems.

System: Basketball
Product Code: BBLB
Related Products: BBESBOARD
