SAFETY PADDING

HiTECHSPORTS pty ltd

COLUMN PADDING

MODEL
WPUB

HiTech Sports supplies a wide range of column and wall padding to suit both indoor and outdoor environments. Options vary in depth, density, fire resistance, and colour. We also offer fully customisable digital printing for names, logos, club crests, and more - perfect for schools, clubs, and stadiums.

Padding is essential for player safety. It helps protect users from injury caused by contact with posts, columns, walls, or any hard surfaces near courts.

WPUB Column Padding

Our WPUB Column Pads are made from 50mm closed-cell foam, covered in a durable vinyl that is resistant to ripping, fire, and mould. Each pad is mounted on an OSD board for simple and secure installation.

- **Standard height:** 1800mm, typically installed 100-150mm above floor level for a total coverage height of approx. 1950mm - clear of floor sweepers and scrubbers.
- **Custom options:** Available for various heights, corners, and to accommodate obstructions like light switches.

Custom Column Pads

Custom pads are designed to suit your space, wrapping around up to three sides of a column and attaching directly to walls or adjacent surfaces. Sizes, sides, thicknesses, and fastening methods can all be tailored to your requirements.
