HiTECHSPORTS pty ltd

SAFETY STRAP

MODEL
BBSS

HiTech Sports strongly recommends safety straps for all roof-mounted and upward-hinged wall-mounted basketball systems, regardless of design or brand, to ensure safety. Safety straps are commonly used worldwide and act as a critical backup in base of mechanical failure or cable breakage.

We offer the most advanced safety straps on the market, available for installation or as a retrofit, to provide extra security for facility owners.

Key features:

- New design with faster retraction than older models
- 50% more belt tension to reduce strap droop during use
- Unique multi-pawl design with fall-sensing inertia plate for quick activation
- Safety feature that prevents re-use once activated in an emergency
- Full system inspection required before reactivation
- Super quiet operation
- Maximum travel and fall indicators
- Nylon strap roller guide to extend strap life
- Integrated pivot mount to align force direction and reduce stress on the building
- Can handle loads of up to 4,500 kg
- Head-treated alloy for increased strength

System: Basketball & Dividing Curtain
