

POST PADDING

HiTech Sports supplies post padding to suit a wide range of applications including educational, sporting, and commercial environments.

We offer two styles of post pad: a flat wrap around pad and a cylindrical pad.

The flat wrap around pads are more suited to schools and childcare centres, where once installed, remains fastened to a post all year round.

The cylindrical pads, with their snug fit, can easily be repeatedly installed, removed and stored. Making them more suited to dynamic organisations such as sports clubs.

Our post padding is custom made to suit any sized posts, featuring a high quality reinforced PVC outer in a wide range of colours (see colour swatches page), and a premium quality environmentally friendly, Australian made, open cell foam inner.

50mm Velcro from top to bottom is used primarily as the fastening system, however, additional fixings such as d-rings, eyelets and tabs are available.

Customised designs with digitally printed artwork also available.
