

SAM Club 225

Ref. 1612030

Economical Main Court system for clubs, secondary schools, community halls, school gyms, national and regional competitions of all levels. Projection 225 cm. FIBA approved Level 3. The heavy-duty glass backboard is fitted into a full-perimeter steel frame. The ring attaches to the metal plate in the backboard, which is connected directly to the main beam. No bolts pass thru the glass, so dunking never places stress on the glass.

A Pro Strength dunk ring, safety padding on the front, sides and backboard and a robust, nylon net are included.

The backstop can easily be rolled in position. The spring-assisted height adjustment is both simple and safe. Low-maintenance. The 2 floor stamps offer maximum stability in game position.

Storage position

Ring height 260 cm

Ring height 305 cm

Technical specifications

Backstop:	Strong and stable, high-tensile strength steel frame, lifetime maintenance free pivot bearings, 100% enclosed counter weights.
Positioning:	Lifting and lowering by use of SAM system (Spring Assisted Mechanism): easy, safe and low-maintenance. One-step set-up thanks to the APF system (Automatic Pedestal Feet).
