ESSENTIALS BBSG1000 GOAL

MODEL
BBSG1000

Essentials Spring Loaded Basketball Goals offer exceptional strength and playability, competing with entry-level models will serving schools and recreational markets.

The dual spring design eliminates the inconsistency of single spring goals, delivering smooth flex and consistent ball rebound - features rare in entry-level models.

The system features a wrap-around brace for enhanced strength, continuous loop net ties for increased durability (instead of a single welded tie), and an enclosed dual spring mechanism for added safety.

Dual Return Springs

Specifications

The goal is constructed with a balanced dual spring design

The goal deflects proportionally to applied pressure
